## Water Treatment Systems

**Cleartec™** Package Water Treatment Systems incorporate heavy duty advance flow filtration systems with a range of control system options to give high reliability in a variety of application environments.

Systems can be supplied with pre-filtration and interconnecting pipework to provide a coordinated package or single units.

### KEY FEATURES

- One piece package
- Pre-wired and pre-plumbed on skid
- Coordinated control system
- Optional integral pump system

### APPLICATIONS

- PH control
- Fine sediment
- Chemical
- Water softening
- Special media filters
- Iron removal

CONFIGURATION	APPLICATION
Twin alternating	Uninterrupted water supply
Single - no raw water bypass	Water supply interruption during 'non-use' times
Single - raw water bypass	Water supply uninterrupted (some raw water during backwash)
Simple timer control	Backwash/regeneration controlled by timer
